
**WHITE METAL ANNOUNCES COMMENCEMENT OF AIRBORNE SURVEY AT
SENECAL LAKE CU-NI-PGM PROJECT****August 6, 2014**

Thunder Bay, Ontario: Platinum Group Metals Ltd. ("PTM") has informed **White Metal Resources Corp. (TSX-V: WHM)** ("White Metal" or the "Company", formerly Trillium North Minerals, "TNM") of its intent to fly a detailed VTEMplus electromagnetic and magnetic geophysical survey over its Senecal Lake property located in Southwest Labrador. The airborne contractor has mobilized to the area and the survey is scheduled to commence in the coming week. Once all data is compiled, a crew will be mobilizing to the property for follow-up prospecting and sampling on favourable anomalous responses. PTM optioned the ground from White Metal and the terms of the deal are that PTM has to incur a total of \$1.3M in exploration expenditures on the property and pay \$40,000 in cash over the next 48 months to earn a 71% interest in the property. Once PTM has acquired its 71% interest, a joint venture agreement will be formed.

White Metal has also entered into an agreement whereby it has optioned two claim blocks totaling 210 claim units from Metals Creek Resources Corp. ("MEK"). These claims are also located in the Natashquan River area and are included as part of the joint venture deal with PTM. The terms of this deal are that White Metal has issued MEK a total of 500,000 shares for 100% ownership of the claims with the exception of MEK retaining a 1% NSR of which 0.5% can be purchased for \$500,000 (see Trillium North NR dated January 22, 2014).

The Senecal Lake property is comprised of six claim blocks totaling 577 claim units located in the Natashquan River Area. The property has had very little documented historic exploration. The property covers part of the same mafic intrusive complex rocks that host the Ni-Cu-Co-PGE discovery held by Altius Minerals Corp. ("Altius"). Exploration highlights from Altius' discovery as described on its website (<http://altiusminerals.com/projects/natashquan>) include "2.68g/t combined Pt, Pd, and Au (grab) – 6.14% Cu and 388 Pt – 1.04g/t combined Pt, Pd, Au and 1.06% Cu over 1.30m (channel) – 1.04 g/t combined Pt, Pd, Au and 3.92% Cu over 1.00m (channel) – 2.49 g/t combined Pt, Pd, and Au and 1.07% Ni (grab) – Several grab samples > 7% Cu – Soil samples up to 26,000ppm Cu".

White Metal currently has issued and outstanding share capital of 18,916,076 common shares.

On behalf of the Board of Directors of White Metal Resources Corp.

"Michael Stares"

The information contained herein contains "forward-looking statements" within the meaning of applicable securities legislation. Forward-looking statements relate to information that is based on assumptions of management, forecasts of future results, and estimates of amounts not yet determinable. Any statements that express predictions, expectations, beliefs, plans, projections, objectives, assumptions or future events or performance are not statements of historical fact and may be "forward-looking statements."

Forward-looking statements are subject to a variety of risks and uncertainties which could cause actual events or results to differ from those reflected in the forward-looking statements, including, without limitation: risks related

to failure to obtain adequate financing on a timely basis and on acceptable terms; risks related to the outcome of legal proceedings; political and regulatory risks associated with mining and exploration; risks related to the maintenance of stock exchange listings; risks related to environmental regulation and liability; the potential for delays in exploration or development activities or the completion of feasibility studies; the uncertainty of profitability; risks and uncertainties relating to the interpretation of drill results, the geology, grade and continuity of mineral deposits; risks related to the inherent uncertainty of production and cost estimates and the potential for unexpected costs and expenses; results of prefeasibility and feasibility studies, and the possibility that future exploration, development or mining results will not be consistent with the Company's expectations; risks related to gold price and other commodity price fluctuations; and other risks and uncertainties related to the Company's prospects, properties and business detailed elsewhere in the Company's disclosure record. Should one or more of these risks and uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those described in forward-looking statements. Investors are cautioned against attributing undue certainty to forward-looking statements. These forward looking statements are made as of the date hereof and the Company does not assume any obligation to update or revise them to reflect new events or circumstances. Actual events or results could differ materially from the Company's expectations or projections.
