**WHITE METAL SECURES DEAL WITH MURCHISON IN THE PICKLE LAKE AREA****April 12, 2016**

**Thunder Bay, Ontario: White Metal Resources Corp. (TSX-V:WHM)** ("White Metal" or the "Company") would like to announce that it has acquired by staking, two properties in the Pickle Lake Area. The first property, named "The South Limb Property", is directly along strike from the Dona Lake Mine which produced 218,668 ounces of gold between 1987 and 1993. The claim group is also contiguous along a gold-bearing iron formation that has similar structural features as the Donna Lake gold deposit. Compilation work done by White Metal has confirmed that there are numerous untested drill targets in the area. Past work by previous mining companies, such as drilling and a detailed aeromagnetic survey, has demonstrated that the same structural features exist on the South Limb Property as the Dona Lake gold deposit. The second property, named "The Pickle Lake East Property", is located five kilometres west of the Pickle Lake gold camp and covers an area of intense magnetic disruption that appears to reflect folding in the host iron formation. Work performed by the previous owners located a boulder containing anomalous gold and arsenic that was found just to the southwest or down-ice of this magnetic disruption.

White Metal would also like to announce the resignation of David Speck from the Board of Directors and thank David for his service and wish him all the best in his future endeavours.

The Company also announces that, subject to regulatory approval, it has issued 275,000 to a director and to an officer of the Company. The options will be exercisable at \$0.10 per share for a period of five (5) years.

White Metal is a junior mineral exploration company exploring in Canada and currently has 19,316,076 common shares issued and outstanding.

**On behalf of the Board of Directors of White Metal Resources Corp.**

"Michael Stares"

Michael Stares, President and CEO
