## WHITE METAL ANNOUNCES COMPLETION OF GEOCHEMICAL SAMPLING ON THE MANITOUWADGE PGE PROJECT

December 4, 2014

**Thunder Bay, Ontario: White Metal Resources Corp. (TSX-V: WHM)** ("White Metal" or the "Company") is pleased to report the results of 600 soil and humus geochemical samples and 60 rock samples that were collected on the Manitouwadge PGE Property. The soils and humus samples were collected over a 7x2 kilometre radius to determine if the various magnetic anomalies had potential to host copper ("Cu"), nickel ("Ni") and platinum group element ("PGE", platinum -Pt, palladium - Pd) mineralization.

The results of the geochemical program outlined several new targets worthy of further follow-up. The new areas outlined by the soil/humus sampling yielded results that ranged from 1 to 917ppm Cu, <1 to 172ppm Ni, <1 to 72ppm Cobalt ("Co"), <5 to 26ppb Pt, <5 to 32ppb Pd, and <2 up to 68ppb gold ("Au"). The line spacing of the soil survey ranged from 200m to 400m and infill lines will be needed to properly extend and delineate the new geochemical Cu-Ni-PGE responses discovered to date.

The results of 60 rock samples that were also collected from the vicinity of the soil/humus survey were also encouraging and yielded results ranging from <5 ppm to 10% Cu, <5 ppm to 0.19% Ni, <5ppm to 0.2% Co, <5 to 253ppb Pt, <5 to 333ppb Pd, and <5 to 135ppb Au. The only historical airborne magnetic – electromagnetic survey completed in the region utilized 150m spaced flight lines parallel to the strike of the stratigraphy underlying the Manitouwadge PGE property and thus may have resulted in poor results. A new airborne with flight lines oriented perpendicular to the underlying stratigraphy may help identify geophysical targets associated with potentially economic Cu-Ni-PGE mineralization. To date there has been very limited Cu-Ni-PGE exploration work documented in the new area of magnetic anomalies covered by the recent geochemical survey.

White Metal Resources is a junior exploration company exploring in Canada and currently has issued and outstanding share capital of 18,916,076 common shares.

Clinton Barr (P.Geo.) is the qualified person responsible for this release.
